Helping you safely manage your everyday money

In collaboration with
**Alzheimer's
Society**

What is Sibstar?

Sibstar is a debit card and app.

Anyone can have a Sibstar card.

If you want to manage your money yourself, you can have a Sibstar card and app.

Or if you are supporting someone who needs help, they can have the card and you can have the app.

“Living with dementia and a burning desire to watch live music.”

How does Sibstar work?

Load the Sibstar card with your chosen amount of money and then, in the app, manage how and where that money can be used.

You can:

-  Set daily and monthly spending limits.
-  Set a cashpoint withdrawal limit.
-  Switch off cashpoint, online and phone use.
-  Instantly freeze/unfreeze the card.
-  Receive real time notifications to your phone every time the card is used.

All of this functionality can be changed instantly and remotely, so Sibstar adapts to your individual needs.

Why Sibstar?

Sibstar helps people living with dementia remain financially independent, so they can enjoy their everyday activities while knowing their money is safe.

Helping you live life the way you want to.

Our friendly UK Customer Service team are here to help Monday to Friday, 8am-6pm.

“What we spend our money on is a big part of who we are. Both my mum and dad had dementia and I was determined to help them continue living life the way they chose. This is why we created Sibstar.”

Jayne Sibley, Co Founder, Sibstar and carer to mum and dad

Download the Sibstar app from the App Store or Google Play.

Scan to download

Sign up in the app and we'll pop a Sibstar card in the post.

Activate the card when it arrives and you are READY TO GO!
